July 2023

---

## EXPERIENCE

### Interactive Media Exhibition

- Managed a team of designers to create a unique experience for a museum exhibition
- Provided feedback and insight to designers as the UI/UX Lead
- Awarded 'Design Award for Galactic Excellence' presented by Volition

### Caterpillar Engineering App

- Collaborated with engineering and product teams to design an AR maintenance application for tablet
- Created mockups, prototypes, and client presentations
- Conducted several rounds of usability testing

### OSF Kiosk App

- Designed a tablet application interface that facilitated homeless access to healthcare and other essential services
- Worked directly with client through planning and presentations

### WireSense AR App

- Developed brand, information architecture, user flows, and personas to establish the application core
- Designed AR mobile application prototype that allowed users to see active cabling and other POIs through walls

### Wellness Wearable App

- Created wearable solution for apple watch users to improve mental health through variable check-ins
- Created mockups, presentations, and prototypes

### Live Double-Blind Penetration Test

- Facilitated communications between teams as a liaison
  - Planned security assessment, executed assigned tasks, and reported results to the client
  - Executed a successful on-site team breach
-
